Experience

ExponentialAI

Feb 2025 – Present

Python Developer

- Worked on stabilizing the **Prior Authorization Automation pipeline**, fixing issues across multiple environments and claim-processing stages.
- Analyzed the **authorization matrix** and implemented **Rule 205** logic by understanding end-to-end data flow and validations.
- Performed large-scale **MSSQL data validations** and wrote optimized queries to support complex claim datasets.
- Improved **XGBoost** model accuracy by analyzing false positives/negatives and enhancing preprocessing conditions.
- Used **GitLab CI/CD** for automated deployment and version control of Python modules.
- Developed a **FaaS** module in the **ENSO** platform to determine prior authorization using data-driven rules and edit logic.

Infosys

Jan 2024 – Feb 2025

Senior System Engineer

- **Talking Head**
 - * Developed an interactive chatbot with **Azure OpenAI API** and integrated **Microsoft Text-to-Speech (TTS)** for audio responses. Mapped visemes to a **Digital Human Avatar** for dynamic facial animations using **NodeJS**, **ThreeJS**, **HTML**, **CSS**, and **JavaScript**, ensuring a seamless user experience.
- **Web Metaverse**
 - * Spearheaded the development of a **web-based metaverse** application, enhancing user engagement to support 100+ concurrent users and achieving a 25% increase in daily active users.
 - * Integrated **video calls**, **audio calls**, and **chat** functionality, enabling seamless communication among users, and added **Screensharing** using Agora ScreenShare SDK.
 - * Engineered and launched a **3D card shuffle game**, significantly improving user experience and engagement.
 - * Conducted performance analysis, optimizing load times by 30% using Chrome DevTools, and leveraged **pm2 cluster mode** for performance optimization.
- **Infy Mart**
 - * Formulated **API** calls in **C#** to retrieve data from Amazon backend servers, resulting in a 40% speed enhancement in data retrieval.
- **Security**: Resolved critical production vulnerabilities, ensuring application stability and security.

Infosys

Mar 2022 – Jan 2024

System Engineer

- **Virtual Living Labs**: Contributed to an internal R&D platform improving team collaboration and productivity.
- **HSBC POC**: Developed an interactive **3D globe** using **ThreeJS** and **amCharts**.
- **KPMG Deployment**: Deployed Virtual Living Labs in client environments with smooth external integration.
- **TGE Solariswind DB API**: Built custom **Node.js APIs** for efficient data retrieval.

Infosys

Nov 2021 – Mar 2022
